

Uncover, Protect and Thrive Unveil your Vulnerabilities with Pen Testing

Are you prepared for real-world security challenges?

23%

increase in cyber incidents
in Australia

14%

rise in financial losses
due to cybercrime

43%

of attacks are aimed
at SMBs

Stay One Step Ahead

Detect Weaknesses Before They're Exploited

Assess the current level of weaknesses in your cyber security posture. Let Inspired IT's cyber security experts simulate real-world attacks to identify vulnerabilities in your systems, network or applications.

A Pen Testing Solution You Can Trust

Multiple Software Tools: We apply two layers of vulnerability scans to capture potential security issues.

Beyond Automation: We set ourselves apart by having our cyber security specialists detect nuanced security issues only identifiable through human intuition.

Visibility: We conduct an inventory of all your digital assets so no stone is left unturned and the entire attack surface is identified.

On-site Analysis: We are able to provide a tailored solution as we physically come to your offices and look at the specificities of your infrastructure.

Actionable insights: Receive a detailed report including your risk rating and our recommended course of action to minimise the chance of a breach.

Your Journey to Stronger Defences

Asset Discovery

Our IT security engineer attends your premises and conduct a security audit to identify all devices present on your network. This usually takes between 3-4 hours to complete.

Firewall Analysis

We also evaluate your firewall configurations and rule sets for potential by-pass technique.

Report & Remediation

We prepare a comprehensive report including the vulnerabilities we discovered, the exploitation outcomes, the potential business impact, and our recommendations for mitigating those risks.

Vulnerability Scans

We scan your network for vulnerabilities using multiple software tools and databases to capture the widest scope of potential security issues.

Penetration Test

After analysing the information collected during our visit, we will perform our penetration and web test at your premises (6-7 hours).

Whether you want to measure the effectiveness of your cyber security strategy or you don't know where to start and what you need, our pen testing solution is for you.

Talk to our cyber security experts today.
